How to replace your refrigerator

- ✓ Arrange an appointment for a free energy-saving check and have your refrigerator tested.
- ✓ If your appliance is more than 10 years old and consumes too much electricity, you can get a subsidy for a new, energy-saving appliance.

Get in touch with us.
We will be happy to advise you.

Old refrigerators are electricity guzzlers

Is your fridge or freezer more than 10 years old?

Then you can get **a cool subsidy** with the energy-saving check when you buy a new energy-efficient appliance.

This will save you electricity costs – year after year.

The more people live in a household, the higher the subsidy.

Up to 200 euros for a new refrigerator!

Depending on the region, you can often get an attractive local subsidy on top.

Talk to us about it – it always pays off.
